TEMPERATURE PROFILE

- Deposit solder paste 'SnAg4Cu0.5' on mounting zone by screen printing application. We recommend a low residue flux. We advise a thickness of 150μm.
- Placement of the receptacle on the mounting zone with an automatic machine of 'pick and place' type.

A video camera is recommended for positioning of the component. Adhesive agents must not be used on the receptacle.

- 3) This process of soldering has been tested with convection oven. Below please find, the typical profile to use.
- 4) Verification of solder joints and position of the component by visual inspection.
