

75 Ohm 1.0/2.3 Plug Push-On Connector Crimp/ Crimp Attachment For RG6-CATV Cable

Fairview Microwave's 75 Ohm DIN 1.0/2.3 connectors have a secure quick-locking push/pull design creating a convenient fastened connection. These 75 Ohm 1.0-2.3 DIN connectors operate to 3 GHz, making them an excellent choice for many data communications and video applications, including 3G video. The small size and push/pull connection method allows for a dense connector-to-connector footprint, saving valuable space in panels and other applications requiring a high number of interconnects. These durable RF connectors also have a mating life of up to 500 connections. This popular series is available in PCB mount designs, bulkhead designs and cable designs and are all available for same day shipment.
