

**RF Load 100 Watts High Power To 2.7 GHz Low PIM  
 Black Anodized Aluminum N Female**

Fairview Microwave's FMTR1032A is a high power RF cable termination (also called RF load or dummy load) that operates from 380 to 2,700 MHz and handles up to 100 Watts CW. Our N termination / load is a 50 Ohm impedance and has a Female gender. FMTR1032F load termination offers 1.22:1 Typical VSWR and low PIM (passive intermodulation) of -160 dBc. This Fairview Microwave 100 Watts terminator has a heatsink body which is designed to provide adequate heat dissipation within its full frequency of operation.

RF load / terminations are indispensable components in many RF, microwave and millimeter wave systems where signal reflection from unused ports can potentially damage the device or reduce the signal integrity. By terminating an unused port with a matched load (dummy load), the incident energy will be absorbed with minimal reflection. These termination components are commonly used to terminate devices such as couplers, hybrids, and combiners. They are also widely used in measurement systems to ensure accurate results. Fairview Microwave offers a huge selection of RF, microwave and millimeter wave terminations up to 65 GHz with excellent performance over the entire operating range and power handling capabilities up to 800 Watts CW.

**Features:**

- High Power
- RF 50 Ohm Impedance
- 380 to 2,700 MHz Frequency Range
- Typical VSWR 1.22:1
- Max Power 100 Watts CW
- Low PIM
- N Female Coaxial Interface
- DC Open

**Applications:**

- Wireless
- SatCom
- Test and Measurement
- Commercial and Military Communication
- Base Station
- 4G/AWS/PCS
